 LinkedIn

Computer Science Engineering student skilled in Python, Flask, Firebase, REST APIs, and full-stack web development, with interests in AI, DBMS, cybersecurity, and entrepreneurship.

Year	Degree/Certificate	Institute	CGPA/Percentage
2025-2029	B.Tech Computer Science & Engineering	IHRD College of Engineering, Attingal	-
2024	Kerala State(XII)	PKMMHSS Edarikkode, Malappuram	91.33%
2022	Kerala State(X)	PKMMHSS Edarikkode, Malappuram	97.00%

- **NASA Space Apps Challenge** 4 Oct 2025 - 5 Oct 2025
Globally nominated & won local event Trivandrum
 - Urban Heat Risk & Sustainable Site Planning platform that turns satellite pixels into site-ready insights.
 - Data & Tech: MODIS, NASA GIBS, NASA POWER, VIIRS, Earthdata APIs | Python, ML, AI tools
 - Actively contributed to the project through presentation design, UI aesthetics, documentation, software testing, and content preparation.
- **Tink-Her-Hack** 20 Feb 2026 - 21 Feb 2026
Ranked fourth Trivandrum
 - Created a full-stack menstrual health platform with cycle prediction, wellness tracking, analytics dashboards, and privacy-controlled sharing with trusted contacts.
 - Owned end-to-end backend development, including API design, user authentication, database architecture, data processing, and deployment.

- **NutriScan | Python, Flask** 14 Feb 2026 - 19 Feb 2026
Personal Software Engineering Project **Github**
 - Built a food ingredient assessment platform using the Open Food Facts API and barcode-based product lookup.
 - Implemented Halal/Vegan ingredient detection and a custom nutritional health score (0–100).
 - Developed Flask REST APIs that convert raw product data into structured, frontend-ready insights.
- **Cycora | Python, Flask, Firebase, JavaScript** 20 Feb 2026 - 21 Feb 2026
AI-Powered Women's Health Platform **Github**
 - Built a menstrual wellness platform for cycle tracking, symptom logging, and mood monitoring.
 - Developed Flask REST APIs with Firebase Authentication and Firestore integration for secure user management.
 - Implemented AI-powered cycle prediction and personalized wellness insights.
 - Designed the Inner Circle feature for privacy-controlled sharing with trusted contacts.

- **Programming Languages:** C/C++, Python, HTML, CSS, Javascript, MySQL
- **Tools and Frameworks:** Flask, Firebase Authentication, REST APIs, Git, GitHub, VS Code, Figma, Notion
- **Operating Systems:** Windows, Linux & Android

- **CSE & Maths:** Introduction to C, Fundamentals of Computers, Object Oriented Paradigm in C++, Data Structures and Algorithms, Python Programming, Operating System, Database Management System, Discrete Mathematics, Numerical Methods, Software Engineering, Compiler Design, Algorithmic thinking with Python
- **Others:** Basic Electronics & Electrical Engineering, Engineering Drawing, Digital Electronics, Engineering Entrepreneurship & IPR, Basic Arduino

- **Digital Edge 101** Nasscom IT-ITeS SSC
- **Digital 101 Journey** Nasscom IT-ITeS SSC
- **Galactic Problem Solver** NASA

- **Operations Team**,Alchemy IEDC CEAL 2026-27
- **Joint Secretary**,Women in Engineering - IEEE SBC WIE CEAL 2026-27
